

Traditional Launch of a Mega Yacht at Nobiskrug

On Tuesday, 30th March 2010, Nobiskrug Shipyard celebrated the launch of its latest newbuild with the hull number 782 which is one of five mega yachts currently under construction by Nobiskrug.

Following an old tradition, a hearty soup was served in the shipbuilding hall for all employees and subcontractors.

During the launching ceremony, the Yard's Managing Directors and the Project Manager Mr Mark Velthaus as well as the Owner's Representative expressed their thanks for the trustful and successful cooperation.

The finished hull of the yacht ran smoothly from the slipway into the River Eider within seconds.

For the time being, the 74 m superyacht will remain at Nobiskrug's pier before it will be taken into the 160 m superyacht hall for interior outfitting, filling and final top-coating.

Delivery of the yacht is planned for 2011, so that she can leave the cold river Eider for warmer areas.

About Nobiskrug:

Nobiskrug is a shipbuilding company, located on the Eider River in Rendsburg, Germany. Nobiskrug stands for the dedication of true German craftsmanship to manufacture custom-built masterpieces from 60 m to 200 m. With more than 100 years of experience in building naval and commercial vessels and its character of being the invader within the mega yacht market, Nobiskrug has demonstrated its expertise of extraordinary quality: uncompromisingly German. Since summer 2009 Nobiskrug is part of Abu Dhabi Mar. This group also owns the French yard CMN and ADM Shipyards.
