

Classic Launch of a Mega Yacht at Nobiskrug

On Tuesday 27th April, the Rendsburg Shipyard Nobiskrug celebrated another launch from its yacht newbuilds.

Currently five mega yachts are under construction by Nobiskrug.

One month after hull number 782, yacht number 783 is to be launched thereby celebrating the completion of the structural work.

Both the interior and exterior design of this mega yacht are from Reymond Langton Design, London / GB.

Before the launch of newbuild 783, all employees and subcontractors are invited to enjoy a hearty bowl of soup in the shipbuilding hall.

The Mayor of Rendsburg, Mr Andreas Breitner, and the yacht owners are among the guests invited to the celebration.

The managing directors, project leaders and the yacht owners have all spoken about the excellent project cooperation in their speeches.

They also give high praise for the successfully completed work.

After sliding gently into the River Eider the 74 m long motor yacht will remain for the moment on the west pier of the Nobiskrug Shipyard.

She will then be taken into the superyacht hall for final top-coating and interior outfitting, before this Mega Yacht is presented to her owners.

Nobiskrug GmbH:

Nobiskrug is a shipyard, situated at the river Eider in Rendsburg with more than 100 years of experience and tradition in the construction of large seagoing vessels. The shipyard focuses on the newbuilding and conversion of mega yachts longer than 60m. Furthermore Nobiskrug is specialized in the maintenance and repair of naval vessels. Since summer 2009 Nobiskrug is part of Abu Dhabi Mar. The French shipyard CMN and ADM Shipyards are also part of this group.
